- **Personal/biographical statement.** The personal/biographical statement provides the admissions committee with insight into what precipitated the applicant's interest in this academic program. Specifically, what academic, professional and/or personal experiences influenced the decision to apply at this time. It should also explain what the applicant expects to receive from the program and how that will affect the applicant's plans in the future. The summary or overview should be approximately 500 words.

Saint Louis University utilizes the scores obtained from the Advanced Dental Admission Test (ADAT) in the overall appraisal of candidates for admission to our Graduate Program in Pediatric Dentistry. While the ADAT is not currently required for consideration for acceptance into our program, candidates are strongly encouraged to complete the test as an additional part of their application packet.

It is important that all of these materials be submitted as soon as possible, since your application will not be reviewed by the department's admissions committee until all materials have been received and your application is deemed complete.

Again, thank you for your interest in Saint Louis University.
