le. All residents submit and defend a thesis in the final se	mester of the program.

3. To conduct an original research project resulting in a written thesis.

All residents received satisfactory grades in the thesis research courses. Graduating residents completed the research project and thesis defense and were approved by their thesis committee.

.

5. Findings: Interpretations Conclusions

What have you learned from these results? What does the data tell you?

All residents achieved the student learning outcomes. Previously of the data points evaluating the preparation for the

The full-time faculty met in August 2021 to discuss the low team-expected inservice exam scores as compared to the national average. At that time, we decided to implement changes to the discipline specific program curriculum. These changes were susfcelly implemented during the 2022/022 academic year.

B. How has this changle ave these changes en assessed?

The change is assessed tacking test scores for the 2022 and 2023 classes.
