Technical Competency and Professional Knowledge – Apply professional standards to resolve financial reporting issues. A formal problem solving rubric used to quantify problems in graduate level accounting courses was used to evaluate the student's performance on the comprehensive homework assignment described in item #2. The rubric was applied to the student's completed assignments by the instructor of ACCT 110, M. Neil Jansen.

Technical Competency and Professional Knowledge – Apply professional standards to resolve financial reporting issues. A formal problem solving rubric used to quantify problems in graduate level accounting courses was used to evaluate the student's performance on the completion of the US Return on Partnership Income described in item #2. The rubric was applied to the student's completed assignments by the instructor of ACCT 340, M. Steven Leni nE D Y - k 4 k (C N u J (C I E 9 E 9 k 4 k (C N a J (I E 9 E 9 k 4 k (C

Findings: Interpretations & Conclusions

As a whole, we strongly believe that the results of all of the currently assessed learning objectives are indicative of courses that provide students with the necessary technical and soft skills to be successful both in their professional careers and on the CPA exam. While there are certainly areas where the assessments

The normal assessment plan of the Master of Accounting program indicates that the assessment findings are to be presented to a department meeting during the subsequent semester, such that all department faculty have
