## A. THE ELEMENT BY WESTIN HOTEL

The Element by Westin is set to ope
September. This extended-stay acility, just a short walk from campus travelers and families. It will feature a Motion Fitness Center, an all-natural saline pool, abike borrowing program da a rooftop bar
eveloped by Midas Hospitality, the x-story hotel will not only include so allow groups to spend time ogether in a private setting. The
lement by Westin's 153 suites of
pa-inspired bathrooms and th
estin's signature Heavenly Beds.
ach suite includes four guest rooms
and a living room area.

The center also added sections of its "Introduction to Online Teaching" course, a digital seminar that formally prepares faculty in online pedagogy. The center will offer more of those going forw ard - both the
typical four-week course as well as a new, intensive typical four-week course as well as a a ew, intensive
two-week option that includes all the same content. M erys acknowledged that even with the Reinert Center's help, moving a course from in- person to online is a big challenge.
"W e have faculty who are top experts in their field, most of whom arealready outstanding, award-winning

$\square$r. M atthew Zimmie came to Saint Louis University in January 2020, joining the staff as an assistant vice president in Information Technology Services and the chief medical information officer for SLUC are, SLU's academic medical practice. Little did he know what would face just mere months later.位 he novel coronavirus, COVID-19, forced the closure lective medical procedures at SSM Health Saint Louis University Hospital, SSM Health St. M ary's Hospital and SSM Health Cardinal Glennon Children's Hospital. In a matter of weeks, SLUC are transformed most eas of the practice, transitioning to telehealth appointments.
"M edicine is a little bit behind the times on this," Zimmie said. "T here was always the question of reimbursement from the CM S (Centers for Medicare and M edicaid Services), which sets the federal rate. You add very busy phyicians, with verybusy practices, and health appointments."
Zimmie said the federal government moving to pay practitioners the same rate for in-person or virtual visits incentivized a move forw ard with telehealth.
"People saw how serious this was," Zimmie said

'To the credit of SLU's CFO David Heimburger and President Dr. Fred Pestello, they recognized quickly hat we were going to have to do things in a very dif that would do what we needed it to do," " immie said. It has worked out so splendidly.
Zimmie said SLU's priority, putting tope first Zame through as leadershi, navigated the rapidly changing landscape. SLU'sinformation technology professionals readied the University to operate virtu7 (i)-JTJOTc 4011 Twm3 (a)-23.2 (S (e)-16 (d. 003 a7.4 (i) -

## CARING FOR STUDENTS AND THE COMMUNITY

In one month, everything had changed. People were craving information. In no time, SLU-M adrid's online updates were reaching a worldw ide audience, with more than 255,000 visits to the campus' news webpage during M arch alone
en away from family campus staff focused on making surestuden semester are an "W e were in close contact with the U.S. Embassy and with the students, safely said. W hile many of the flights back to the United States were delayed or re-routed, every student returned safely. On their return, the students were equired to go into
self- isolation for 14 days because clearly - both by the time some of them left Spain and en route back to the United States - they were at ahigh risk of being exposed to COVID-19
Classes weren't the only thing to and advising support shifted, too. Students were dealing with anxiety and the stress of travel. Plus, the sudden change from the freedom of mobility - strolling through the one's bedroom back at home showed that students needed support.
Throughout this situation, SLU's students impressed me," Vita said. "They were responsible and mature and faced tough, real-life decisions. abroad in spring 2020 learned more about themselves and their connection to global issues than any other group could."
As staff worked to assist students and faculty adapted to online teaching, SLU-M adrid's commitment to seampus began virtual instruction, Dr. Tania dela Fuente, program director for health sciences, spearheaded an effort to donate the gloves, goggles,

ong many in the SLU community who are putting their expertise to work to tackle the
COVID-19 pandemic is director of SLU's Institute for Biosecurity, Dr. Terri Rebmann (Grad VSN '06) who addressed more than 50,000 nurses via a web nar in $M$ arch to answer questions about the virus. In nurse certified in infection prevention and contro and is a fell ow of the Association for Professionals in Infection Control and Epidemiology.
M obilized to quickly educate health professionals about best practices and to share evidence-based research about dealing with infectious di seases, entire career as a public health expert in biosecurity, emerging diseases and disaster preparedness During the American Nurses Association

National COVID-19 web nar, Rebmann addressed nurses across the United morethan 7,100 questions in advance of the session.

Some teachers tell their students, "There's no such thing as a bad question." T he statement is likely aimed at giving students permission to take risks in engaging the all questions are good will certainly admit that there are better questions and worse ones. And in a strange way, this pandemic presents a chance to ask some very good questions.

The questions early in the pandemic became part of nearly every conversation for months. How does it spread? W hat are the symptoms? D oes wearing a mask protect me from it? T hese questions place the virus at the center of the story. Thy could only essary to a nsw
The questions soon became less about the virus itself and more about our reacTione questions soon became less about the virus itself and more about our reac-
tit worth the risk to go out to a restaurant or travel on an airplane? How should political leaders safeguard our health and our economy? C an we protect those most vulnerable from the insecurities and dangers wrought by the disease? Like the previous set, these types of questions have rightly become part of daily conversations. This particular moment invites us to something more. ter. Instead, wewill consider ourselves both individually and collectively, and we will ask how we want to live, whether we find ourselves in a pandemic or not. W hat are my highest priorities in life? How responsible do I feel for my neighbor? How can we best organize society to ensure everyone has a chance to flourish? T hese are not the
